

GynOsitol

FOR WOMEN WITH PCOS

A Natural Option to

- Restore regular menstrual cycle
- Increase pregnancy probability
- Decrease Acne & Hirsutism

2 sachets / day

60 sachets / box

What is PCOS?

Polycystic Ovary Syndrome (PCOS) is the most common cause of menstrual disorders, ovarian dysfunction, and infertility. Its prevalence is estimated to be about 10-15% of the female population. The most common features are:

- infrequent, irregular or absent ovulation (usually manifested as irregular or no menstrual cycle),
- excess androgen activity (leading to male-pattern hair growth (hirsutism) and acne)
- polycystic ovaries with typical features seen on ultrasound.

Why GynOsitol®?

- Restores **REGULAR menstrual cycle** within 1 to 3 months in 60 to 70% of women with PCOS;
- Decreases **acne & hirsutism** of women with PCOS within 3 to 6 months;
- Increases **pregnancy probability** of women with PCOS trying to conceive
- **Naturally** (without fertility treatment): between 15 to 30% will have a positive pregnancy test within 2 to 6 months;
- **With fertility treatment:** increases IVF success significantly

More about GynOsitol®

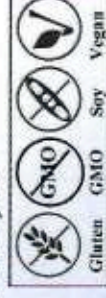

GynOsitol® is a **NATURAL** product containing myo-inositol derived from plants.

Myo-inositol is found in some foods we eat and is also produced daily by our kidneys.

Recently, it has been demonstrated that women with PCOS have a deficit of myo-inositol in their ovaries.

Numerous studies involving **4 grams of myo-inositol daily** have shown many benefits for women with PCOS.

- **Convenient unidose sachet**
- **Easy to use:**
 - Dissolve mildly sweet powder in any hot or cold beverage
 - Morning and evening
- **Suitable for women over 13 years old**
- **High quality product containing myo-inositol, folic acid, maltodextrin and silicon dioxide**
